## **EXPERIENCE**

### YEXT Software Engineer (Full Stack), Yext Chat

Apr 2023 - Present | Arlington, VA

- Delivered an enterprise Al-powered chatbot development platform on a 6-month timeline, working closely in a team of 4 to efficiently and effectively crush audacious sprint goals.
- Architected, developed, and maintained Go and Java backends,
   TypeScript React frontends, and MySQL and Snowflake data layers.
- Spearheaded design and implementation for an internal platform to draft, backtest, and experiment with the various prompts powering Yext Chat, leveraging data from real customer interactions.
- Frequently led and participated in design discussions within the company for new features, as well as externally for third-party integrations.

### YEXT Software Engineer (Backend), Yext Pages

Aug 2022 - Mar 2023 | Arlington, VA

- Reliably delivered new features and frequent maintenance updates to the Go backends powering thousands of webpages backed by customer data stored in Yext Content.
- Learned and employed enterprise software best practices, including rigorous testing techniques, strong documentation, and measured, effective incident response.
- Created an interactive tool within the Yext CLI to streamline the Pages development process, allowing users to more easily configure their site for typical use cases.

# YEXT Consulting Software Engineer Intern

June 2021 - Aug 2021 | Arlington, VA

• Contributed to full-stack web development projects for dozens of major clients.

### UNIVERSITY OF VIRGINIA Database Developer

July 2020 - June 2021 | Remote

• Optimized, organized, and developed queries for the UVA Religious Studies Dept.'s Nauvoo Early Mormon Marriages Database.
